

Delivering innovative ISTAR solutions

***“Delivering to our Customers total awareness, total protection.
Help them see, keep them safe.”***

Global footprint

- Over 70 international customers served
- Companies in UK, Italy, US, Saudi Arabia
- 7000 employees
- 1.7 billion euros revenues
- 15% R&D

Domains

Integrated solutions for battlespace superiority and awareness

Air Superiority, rotary and fixed wing operations

Multirole radar
Mission critical systems and avionics
Protection and countermeasures
Advanced tracking, targeting and identification
EO turrets

Tactical ISTAR

UAS
Multirole sensors
Mission Systems
Common ground control station
Data fusion and sharing
Battlefield observation, tracking and targeting
Dismounted soldier awareness and targeting
Unattended sensors and networks

Integrated solutions for total surveillance

Fixed and rotary wing surveillance operations

Surveillance mission systems
Detection, tracking, identification
and targeting sensors
Persistent surveillance, active and
passive tracking and monitoring
Integrated sub-systems

Persistent and unmanned surveillance operations

Mini-micro and tactical UAS
Multirole sensors
Mission Systems
Common ground control station
Integrated land surveillance units
Data fusion and sharing
Unattended sensors and networks

Advanced systems for sea operations

Situational awareness

*Infrared search and track
EO aiming and anti-aircraft sights*

Navigation and landing aids

Infrared navigation systems

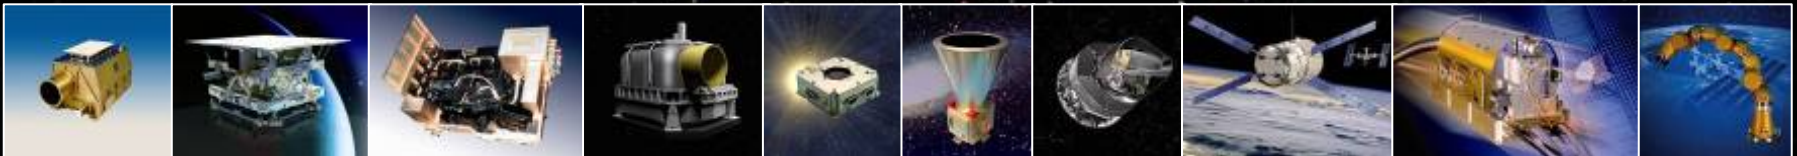

Electronic Warfare

*Identification & protection
Countermeasures*

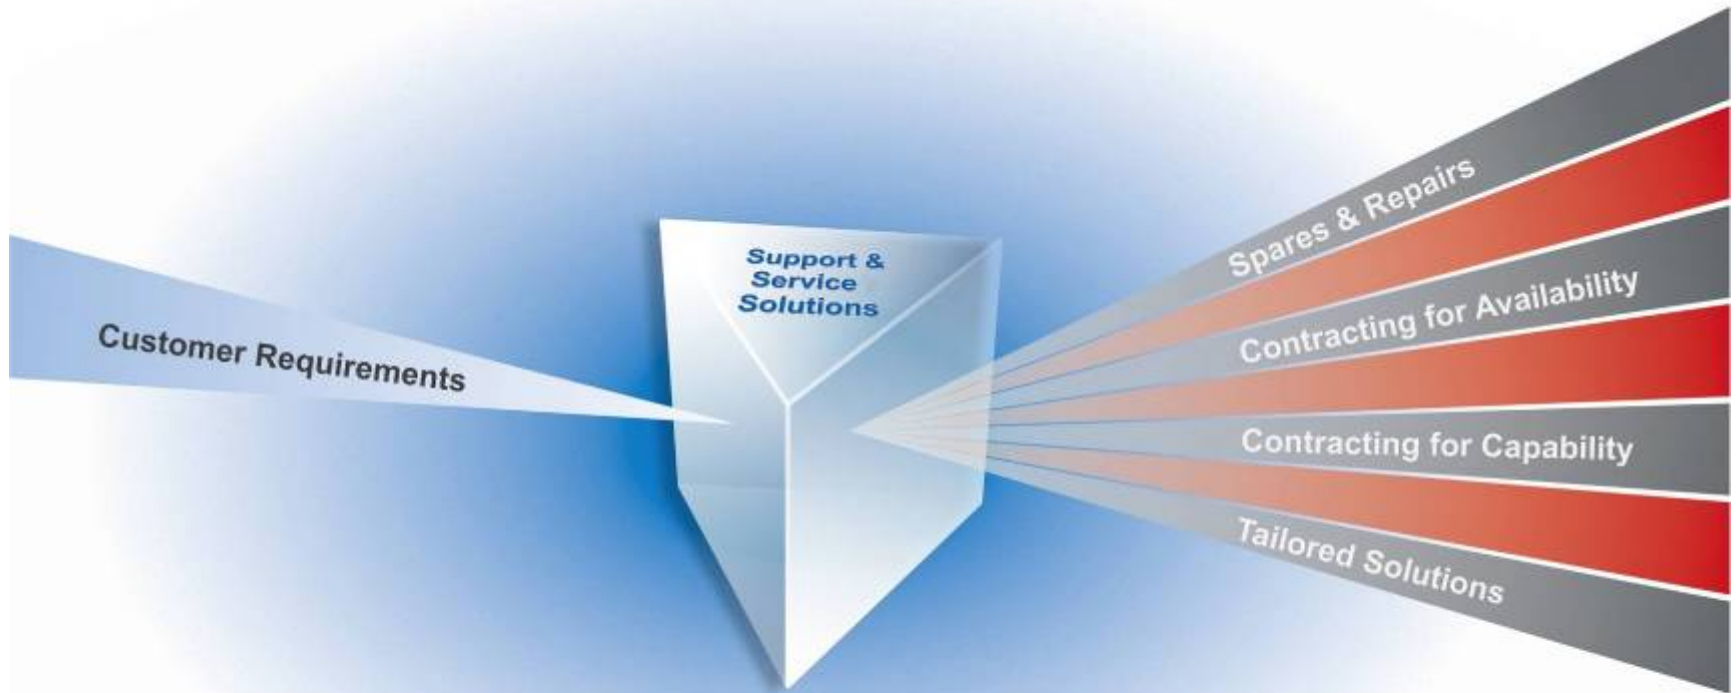

New generation space payloads and equipment

Scientific payloads
Space observation sensors
Earth observation sensors
Attitude control sensors
Power generation and control
RF equipment
Automation and Robotics

A tailored approach to through life capability management

SELEX Galileo – Business Structure
