

NMI Verification Network

“Collaborative Projects - Verification Roadmapping”

Tuesday 29th June 2010

Rutherford Appleton Laboratory, Didcot, OX11 0QX

Event Theme

Earlier this year, NMI published a **Verification Roadmapping** report containing an excellent cross-section of industrially-relevant projects.

This event will review the projects in the report, outline funding options and present case studies of industrially-relevant R&D. The aim is to progress the projects in the report by encouraging business/business and business/academic collaboration.
